INCREASING PROFITS

More Bets

The player can make two types of additional bets, increasing the total drop per unit time. The first type of bet is a bonus bet. It allows to get a win if there is a winning combination of cards, or if the bonus system decides to reward the player. The second bet is on the wheel of Fortune. It allows the player to play the Wheel of Fortune if he has a certain card.

A higher loyalty

Due to the optimized gambling mathematics, the system allows the guest to win more frequently – which increases his loyalty, the guest plays more often and, consequently, the casino earns more.

New players

The main prize in the bonus system is a progressive jackpot, which is replenished with every bet made. If the player has one of the highest combinations, such as Royal Flash, he receives this jackpot partially or completely. The size of this jackpot is impressive - several hundred thousand dollars. This massive jackpot can be effectively used to attract new players - we provide technical means to advertise this jackpot on large outdoor displays and on the internal displays of the casino.

ASSISTS A DEALER IN HIS WORK

Doesn't distract

The system requires minimal engagement of the dealer; thus, the probability of error is significantly reduced.

Controls

The dealer rating system allows to assess how effectively they attract players to bets in the bonus system.

Motivates

Being in the top of the raking is encouraged, which motivates dealers to actively attract gambler to place a bet.

NO MORE GAMING TABLE SIGNS

The gaming table signs are no longer needed - the current game and available bets are displayed on the player's screen.

WHAT ELSE?

The system allows you to display on indoor and outdoor screens of the casino the huge progressive jackpot, which attracts new players. Also, the bonus system creates events to be covered on the public pages of the casino.

Advertising of casino services
